Quiz on The autonomic nervous system

1. What are the two main parts of the autonomic nervous system and what are their primary functions?

A. Sympathetic part prepares the body for emergencies, Parasympathetic part conserves and restores energy
B. Sympathetic part conserves and restores energy, Parasympathetic part prepares the body for emergencies
C. Sympathetic part inhibits the body's response, Parasympathetic part stimulates the body's response
D. Sympathetic part stimulates the body's response, Parasympathetic part inhibits the body's response

2. What are the two main parts of the autonomic nervous system and their primary functions?

A. Sympathetic part - conserves energy, Parasympathetic part - prepares the body for emergencies
B. Sympathetic part - prepares the body for emergencies, Parasympathetic part - conserves and restores energy
C. Sympathetic part - controls voluntary muscles, Parasympathetic part - controls involuntary muscles
D. Sympathetic part - controls glands, Parasympathetic part - controls smooth muscle

3. What is the primary function of the autonomic nervous system within the central nervous system?

A. To control voluntary muscle movements
B. To regulate involuntary structures such as the heart, smooth muscle, and glands
C. To process sensory information
D. To coordinate reflex actions

4. What are the two main parts of the autonomic nervous system and their primary functions?

A. Sympathetic part - conserves energy, Parasympathetic part - prepares the body for emergencies
B. Sympathetic part - prepares the body for emergencies, Parasympathetic part - conserves and restores energy
C. Sympathetic part - regulates involuntary structures, Parasympathetic part - controls voluntary movements
D. Sympathetic part - controls voluntary movements, Parasympathetic part - regulates involuntary structures

5. What is the primary function of the autonomic nervous system within the central nervous

system?

A. To control voluntary muscle movements

B. To regulate involuntary structures such as the heart, smooth muscle, and glands

C. To process sensory information

D. To coordinate complex cognitive tasks

Answer Key

1. A
2. B
3. B
4. B
5. B
