

Quiz on Parts of the brain

1. Which part of the brain is primarily responsible for skilled movement?

- A. Cerebellum
- B. Cortex
- C. Grey matter
- D. Brain stem

2. What are the two main parts of the cerebrum, and where is the diencephalon located in relation to the third ventricle and cerebral aqueduct?

- A. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the third ventricle and anterior to the cerebral aqueduct.
- B. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the cerebral aqueduct and anterior to the third ventricle.
- C. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the third ventricle and anterior to the cerebral aqueduct.
- D. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the cerebral aqueduct and anterior to the third ventricle.

3. What are the two main parts of the cerebrum, and where is the diencephalon located in relation to the third ventricle and cerebral aqueduct?

- A. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the third ventricle and anterior to the cerebral aqueduct.
- B. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the cerebral aqueduct and anterior to the third ventricle.
- C. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the third ventricle and anterior to the cerebral aqueduct.
- D. The cerebrum is divided into the diencephalon and the telencephalon; the diencephalon is located posterior to the cerebral aqueduct and anterior to the third ventricle.

Answer Key

1. A
2. C
3. C
