

Quiz on Neurochemicals

1. In the context of neuroscience research from 1999, which two neurotransmitters are noted for their interaction in the human brain stem and its behavioral implications?

- A. Dopamine and serotonin
- B. Corticotropin-releasing hormone and serotonin
- C. Acetylcholine and dopamine
- D. GABA and glutamate

2. In the context of neuroscience research from 1999, which two neurotransmitters are noted for their interaction in the human brain stem and its behavioral implications?

- A. Dopamine and serotonin
- B. GABA and glutamate
- C. Corticotropin-releasing hormone and serotonin
- D. Acetylcholine and norepinephrine

3. What is the estimated space between adjacent elements in the brain's extracellular fluid compartment?

- A. 100 Å
- B. 200 Å
- C. 300 Å
- D. 400 Å

4. According to the research by Holt DJ, Graybiel AM, and Saper CB in 1997, what is the neurochemical architecture of the human striatum primarily composed of?

- A. Serotonin and GABA
- B. Dopamine and glutamate
- C. Dopamine and serotonin
- D. Glutamate and GABA

5. Which of the following researchers conducted a study on the ultrastructure of nodes of Ranvier in 1959?

- A. de Robertis, E. and Bennett, H. (1954)
- B. de Robertis, E. and Norinski, W.W. and Saez, F. (1965)
- C. Robinson, J.D. (1958)
- D. Robinson, J.D. (1959)

Answer Key

1. B
2. C
3. B
4. B
5. D
