

Quiz on The Autonomic Nervous System

1. What are the two main parts of the autonomic nervous system and what are their primary functions?

- A. Sympathetic part prepares the body for emergencies, Parasympathetic part conserves and restores energy
- B. Sympathetic part conserves and restores energy, Parasympathetic part prepares the body for emergencies
- C. Sympathetic part inhibits the body's response, Parasympathetic part stimulates the body's response
- D. Sympathetic part stimulates the body's response, Parasympathetic part inhibits the body's response

2. What are the two main parts of the autonomic nervous system and their primary functions?

- A. Sympathetic part - conserves energy, Parasympathetic part - prepares the body for emergencies
- B. Sympathetic part - prepares the body for emergencies, Parasympathetic part - conserves and restores energy
- C. Sympathetic part - regulates involuntary structures, Parasympathetic part - controls voluntary movements
- D. Sympathetic part - controls voluntary movements, Parasympathetic part - regulates involuntary structures

3. What are the two main parts of the autonomic nervous system and their primary functions?

- A. Sympathetic part - conserves energy, Parasympathetic part - prepares the body for emergencies
- B. Sympathetic part - prepares the body for emergencies, Parasympathetic part - conserves and restores energy
- C. Sympathetic part - controls voluntary muscles, Parasympathetic part - controls involuntary muscles
- D. Sympathetic part - controls glands, Parasympathetic part - controls smooth muscle

4. What are the two major divisions of the autonomic nervous system (ANS) and their primary locations of origin?

- A. Sympathetic division from the brain stem and parasympathetic division from the spinal cord
- B. Sympathetic division from the spinal cord and parasympathetic division from the brain stem
- C. Sympathetic division from the spinal cord and parasympathetic division from the brain

stem

D. Sympathetic division from the cranial nerves and parasympathetic division from the spinal cord

5. What are the two main parts of the autonomic nervous system and what are their primary functions?

A. Sympathetic part prepares the body for emergencies, Parasympathetic part conserves and restores energy

B. Sympathetic part conserves and restores energy, Parasympathetic part prepares the body for emergencies

C. Sympathetic part inhibits the body's response, Parasympathetic part stimulates the body's response

D. Sympathetic part stimulates the body's response, Parasympathetic part inhibits the body's response

Answer Key

1. A
2. B
3. B
4. C
5. A
